The actual Open Box product may differ in packaging and included accessories, but has been tested to ensure basic functionality. First time we tried ECS, it lacked option to make the board start up automatically when it gets power. Something that was common back then and necessary to reboot servers remotely. It's an AMIBIOS. All AMIBIOS bios powered motherboards have such an option! Booted up no problems with 3.0Ghz P4I had installation issues at all. This board is perfect for his basic computing needs. They all worked with 2 minor problems on one, sound didn't work, and on another, AT mouse port didn't work. Overall, VERY happy with their reliability. I'm waiting till my wife approves a new mobo. I returned this board for a refund instead of a replacement because I wanted a different manufacturer board. Click here for more details. Secure shopping made faster. Check out with PayPal.
