Register a free business account Please try your search again later.The 4inch coils shallower detection area makes it ideal for prospecting in difficult, high metal areas since it allows you to more easily discriminate valuable objects from refuse. In addition to allowing the precise pinpointing of objects, a smaller coil lets you probe tight spots such as corners and crevices.Click here to make a request to customer service.Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Jack Rains 5.0 out of 5 stars Ive been well pleased that can narrow the area you search, and makes you dig smaller holes. I have not found any valuable gold nuggets.I think it must cut thru the trash better if there is a coin and trash like iron or foil is in or close to same layer coin is hurried. Im just a hobby detector, not a daily digger.I swapped it in and it definitely narrowed the debris field that I was hunting. It made it much easier to pinpoint items before digging them up.It works great on a Bounty Hunter Pioneer 202. You wont get the depth of a larger coil, but the accuracy is amazing. You can sweep this little coil all day long with no fatigue. Gets in holes and crevasses the standard coils cant.<https://complektuha.com/UserFiles/corema-chiller-manual-pdf.xml>

- **bounty hunter gold nugget coil manual, bounty hunter gold nugget coil manual download, bounty hunter gold nugget coil manual pdf, bounty hunter gold nugget coil manual 2017, bounty hunter gold nugget coil manual free.**

I got this intending to switch coils during the hunt, but ended up just keeping this one on all day. Besides, it just looks cool. My primary use is coinshooting.Lots of trash every 3 feet.It gets in tight spots and eaks out coins close to larger metal pieces. Great to for finding a Gold nuggets or gold necklaces too in Beach sand.Upon receiving it from Amazon I immediately put it on my 505 to try it out. Boy was I ever surprised. I started finding coins right away and got fewer false signals. I also like the fact that I dont need to change my setting to all metal no motion mode to pinpoint the find. It makes the process of locating, pinpointing and digging up my finds faster. Although I have a pin pointer I dont use it much when using this coil because it does such an accurate job of locating the find to a small area eliminating having to dig big plugs. Although it takes longer to scan the same area as a larger coil, I know that I am finding lots of items that other people have missed. This coil has became my coil of choice for coin shooting. I highly recommend it. Its a must buy for any Bounty Hunter detector.However, this particular item leaves me with a serious question. According to the photo, there is the trade mark BOUNTY HUNTER logo. With the coil I received, there is no logo at all.nothing. Its solid black from top to bottom. So Im not sure if I received a knock off or if it is actually a Bounty Hunter brand. The coil seems to work fine used it in the back yard for about 10 min. Ill get a better idea of its use later this week. But again, it seemed to work fine. I give this item a four only because Im not sure if its a Bounty Hunter brand or not. I like getting what I see in the photos when I purchase something. I definately dont like being surprised with something not as pictured.I had to run it in all metal. It was to much background noise.Light weight, small and easy to

deploy. Great fun. Sorry, we failed to record your vote. <http://ds-dq.com/upload/1599752591.xml>

Please try again Basically I got this for Christmas from my brother for my metal detector. At the time I had the bounty hunter pioneer 505 but now I have added the discovery 3300 to my collection so I can fine tune the ground balance. Im still figuring out the 3300 tho when I hold it close enough to metal that the ground balance is making the right sound I can get a noticeable tone difference putting a vial of .11 flour gold under it. Ive used it twice once in my back yard n today at the park and its really good for pinpointing objects n narrowing in on the search. With the 505 it didnt detect my .11 tho it has auto ground balance n I may have balanced out that small of mineralization. Tho its still a bit of learning I know my detector is a little slow and I may have been walking a little fast. Over all pros affordable easy narrow targeting for smaller holes or finding shapes. real small for prospecting creeks n getting close to all the cracks in bedrock which is what I bought it for. Cons real small almost not practical for open field hunting does n doesnt pick up really small gold. Sorry, we failed to record your vote. Please try again What I liked about it was it made finding coins on a old farm property very easy because I could almost use it the same as a pin pointer. I have added a few photos to show the items found, there wasnt as many old coins as I had hoped but I did find a few interesting items. one was the ET token LOL love that thing, another was the 1902 five cent piece. For those who want to know, I was using it on the Bounty Hunter Quick Draw Pro. Awesome! Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again My GF have a gold nugget, and the stock coil dont detect it, while this one detect the gold nugget. Sorry, we failed to record your vote. Please try again Really accurate as well. Sorry, we failed to record your vote. Please try again Does the job well. Sorry, we failed to record your vote.

This is not my first purchase with Hayneedle. I definitely am impressed with this company, as they are so much more involved with their customers and quality of service. Their products are quality, and their prices are competitive. They sell the same products as a lot of their competitors, but their customer service places them far beyond and above their competitors. I wont mention Kellycos name. There is no comparison. I researched and called a lot of companies before my purchase, and the way I was treated at Hayneedle sealed the deal and made me a repeat customer. See more Quinn, January 7, 2014 Verified purchaser Written by a customer while visiting hayneedle.com 0 0 Average Rating 4.0 out of 5 stars Would have given 5 stars, but. Before I ordered this item, I read the Questions regarding this item. Someone asked if this coil would have the Bounty Hunter insignia on the coil, and the answer was Yes.

<https://formations.fondationmironroyer.com/en/node/8455>

Well I had just received it today from Hayneedle, and was disappointed to see it in plain black with no insignia. Not a deal breaker, but none the less, disappointing. PreQualify Now Compare Financing Options Product Overview Top model. Features enhanced target identification, custom programming, ground balance control, expanded depth reading, large LCD display. This model is a great combination of quality features at a reasonable price. Discover the Bounty Hunter Legacy 3500 The Bounty Hunter Discovery 3300 model has been replaced by the Bounty Hunter Legacy 3500. This model features the latest design and electronics. This top model in the Legacy series adds custom programming, a pinpoint mode and a manual ground balance adjust. The ground balance adjustment eliminates the effects of minerals at the beach. This unit sets a new standard for value at this price point. Feature for feature, this model goes far beyond the competition. At just over 2 pounds, the Legacy 3500 is light weight, well constructed and deep seeking. This model is easy to use and features intuitive controls. Crafted in the USA, this model features an easy to read jumbo LCD display with digital target identification and depth readings. The Legacy 3500 features a ground balance adjustment that allows the detector to operate in the toughest, most mineralized soil conditions. There are no complex adjustments or settings to worry about. Just turn it on and go. Start having fun with this model from your first time out.

[www.cuorpomenteyespiritu.es/wp-content/plugins/formcraft/file-upload/server/content/files/1626fa93f2f74e---bose-av3-2-1-service-manual.pdf](http://www.cuorpomenteyespiritu.es/wp-content/plugins/formcraft/file-upload/server/content/files/1626fa93f2f74e---bose-av3-2-1-service-manual.pdf)

This model will locate coins, rings, gold and relics. Use it at parks or at the beach. No matter how you look at it, the Legacy 3500 offers the best quality, price and features. To top it off, this model is backed by a full 5 year warranty. Four Tone Audio Target Identification System While the LCD Liquid Crystal Display is very accurate in identifying buried objects, the user in the field does not always maintain the display screen in his field of vision. Therefore, we have incorporated an audio feedback mechanism to alert the user to the nature of buried objects. This audio feedback system first alerts the user to the presence and classification of objects, whose nature and location can be confirmed using the LCD display. The detector can sound four different tones, depending on the object detected. Dave is one of the top engineers in the metal detecting industry. He has designed leadingedge metal detectors for American manufacturers for over 25 years. The Bounty Hunter Legacy 3500 is one of his latest accomplishments for the Bounty Hunter brand. Many of his design platforms are the backbone of several companies high end product offerings today. Pictured below, you can see that the engineering team works hard and plays hard. Made In the United States 5 Year Warranty The Bounty Hunter Legacy 3500 is crafted in the USA and is backed with a 5 year parts and labor Warranty. This model features an easy to read jumbo LCD display with digital target

identification and depth readings. No matter how you look at it, the Bounty Hunter Legacy 3500 offers the best quality, price and features. A Deep Seeking Coil Design The Bounty Hunter Legacy 3500 metal detector features a cutting edge concentric search coil design. The triple spoke design punches down deep and cuts through iron and aluminum trash. The concentric coil winding produces smooth operation for all types of treasure hunting. Experience powerful, deep target detection and easy pinpointing.

Understanding the Bounty Hunter Legacy 3500 Concentric Search Coil Design The Bounty Hunter Legacy 2500 concentric coil is engineered with both an inner circle and an outer circle wire winding. The search pattern produced is cone shaped and is excellent for accurately pinpointing targets with ease. This Bounty Hunter Search coil includes the latest technology and is waterproof and electrostatically shielded. In general, larger search coils will give better depth with larger targets and better ground coverage. However, sensitivity to smaller objects may be sacrificed. Smaller search coils will offer greater sensitivity to smaller objects and improved target separation in trashy soil. This coil offers the perfect balance of depth and sensitivity. The Bounty Hunter legacy 3500 features motion discrimination and an all metal pinpoint mode. The numeric target identification accurately identifies buried targets on a scale from 0 to 99. The programmable discrimination provides 4 tone target identification and 7 segment target elimination. The 11 segment digital target identification helps you identify what is in the ground. The notch discrimination filters out junk while still locating gold and valuables. You will enjoy the jumbo LCD display. This unit features a motion discrimination mode and an all metal mode. Targets are identified with a four tone 4 tone audio target response. You can easily identify the targets before digging. A notch discrimination filter gets rid of junk while still locating gold and valuables. A zap mode lets you accept or reject specific targets. The coin depth is shown on the digital display from 0 to 8 inches. The legacy 2500 features a squelch tech noise reduction circuitry digital touch pad controls. The design features a padded arm rest, adjustable aluminum stem and comfort hand grip. Circuitry producing different audio tones for each target's conductivity range, i.e., low tone for nickel, high tone for coins.

The type and amount of batteries used to operate the detector. An indicator to show the user how much battery life is left. The company that produces the detector. Some accessories are designed to be used with a specific device An onboard flashlight. The size and dimensions of the search coil The country where the detector is made An indicaton on the display showing the approzimate depth of the target. A feature available on many detectors that allows the device to filter out signals from minerals in the ground, while accepting signals from actual targets. The size of the headphone jack Holsters are typically included with Pin Pointers Bonus items are shown pictured with the device on the product page are included with this product The overall length of the model when fully assembled Operating modes would include, but are not limited to, discriminate mode and allmetal mode The frequency at which the detector operates. The type of circuitry the detector uses. Typically, you will see VLF Very Low Frequency detectors, and PI Pulse Induction detectors. A mode available on the detector that enhances the accuracy of the detector in a nonmotion mode to allow for precise target location Preset programs are available preprogrammed by the factory. The shape of the search coil. Typically, you will see round, elliptical, or teardrop shaped coils. The type of search coil Most commonly concentric, DD also known as widescan, and Mono available for some PI detectors. This adjustment affects how sensitive the detector is to targets, and ultimately how deep they will be able to be detected. The size of the shirt A vibration feature that allows users to feel targets being detected. A visual target ID that allows the user to determine the composition of the target being detected before digging. Typically, a visual target ID is a numerical display based off the conductivity of the target being detected.

The amount of time the manufacturer will cover any broken parts or malfunctioning electronics. The degree to which the detector is resistant to water. Weatherproof implies that the detector is

resistant to splashing and rain. Send Question Question will be displayed after moderation. Would the Bounty Hunter 3500 be a good choice for someone who really wants to get into this hobby. Question by Cathy on Oct 4, 2017 112200 PM Link Yes, the Bounty Hunter Legacy 3500 is a great choice for someone looking to get started, but also wants some advanced features. This model offers more discrimination options than other detectors for the price range, while also having a ground balance, and sensitivity adjustment. Would the Bounty Hunter Legacy 3500 metal detector be a good choice for my 8 yr. Is it water proof Question by James Oldfield on Sep 11, 2018 52600 PM Link The search coil on this metal detector is waterproof, so you will be able to search in shallow water. The control box is NOT waterproof, so it can not be submerged, or used in the rain. What if I was looking for a 10inch search coil. Question by Jerry on Jun 14, 2016 101200 AM Link Any of the compatible coils and accessories can be found in the related products section of the product page. But here is a quick link to the Bounty Hunter 10inch search coil..and of course the coil cover. How will the gold nugget coil work on my legacy 3500 for the settings and how will it show up what does it read as also Question by Andrew Ruggiero on Mar 21, 2019 105800 PM Link The 4inch coil will certainly be a great option for the 3500 if you're looking for gold nuggets. It will still be able to detect all metals, but it will enhance the detectors ability to detect small targets, like tiny gold nuggets. Question by Kari on Apr 8, 2019 111600 AM Link All frequencies are able to detect gold, but higher operating frequencies will allow a detector to become more sensitive to natural gold nuggets, which are typically very small targets.

Gold coins and jewelry are typically larger than the nuggets you'll come across, so most detectors can handle that. What are all the Rs showing on my Legacy 3500 Bounty Hunter LCD screen Help! Question by MadRiverJack on Jul 14, 2017 32700 PM Link The Legacy 3500 has many top end features such as NOTCH discrimination. Clear filter Total Reviews Search reviews Search Please wait.
