Book Descriptions:

brother xl 5500 manual

Correct tension is important as too much or tooThe stitch will prevent the fabric from unravelling. Making a ButtonholeThe needle should beYou can make long stitches by moving theKeep the carton and packing materials for future use. Numerics GScallop Stitch. 11, 12, 28. Sewing Buttons.33. DANGER To reduce the risk of electric shock 1. The machine should never be left unattended while plugged in. Always unplug the machine from the electrical outlet immediately after using it and before cleaning it. If the plug fitted is not suitable for the power outlet in your home or the cable is too short to reach a power outlet, then obtain an appropriate safetyapproved extension lead or consult your. Lower the presser foot.Lower the presser foot lever and fix the presser foot onto the shank. If the presser foot is in the correct place, the bar should snap in. If you do not cut the thread completely, and the bobbin is wound, when the thread runs low it may tangle around the bobbin and cause the needle to break. A2, until it enters the delivery eye under the tension spring fig. Set the main power switch to "O". Raise the presser foot lever and turn the balance wheel toward you counterclockwise to raise the thread takeup lever to its highest position. While lightly holding the end of the upper thread, slowly turn the balance wheel to the front counterclockwise once by hand to lower, then raise the needle. The upper thread should have caught the lower thread in a loop. Threading the Right Needle Follow the same instructions for threading a single needle. See page 18 for more details. Threading the Left Needle Thread the left needle in the same way that you threaded the right needle using the thread from the spool on the extra spool pin, but do not pass the thread through the thread. Each is explained below.Set the pattern selection dial to the Double Action Stitch. Overedge Stitching Stitch Name Pattern Length. While gently holding the upper thread, start the machine.<http://p-energo.ru/content/daiwa-47h-manual.xml>

The bar tacks of the buttonhole are sewn in the order shown.If it hits, see step At a slow speed, sew about 10 stitches. Remove the material from the machine. The needle should be positioned on the zipper side of the foot for best results. To sew the opposite side of the zipper, release the foot by raising the lever located at the back of the presser foot, position the zipper foot on the other side of the zipper and continue sewing using the notch on the other. Baste the cutout to the fabric at the desired location. Loosen the face plate screw. Remove the face plate from the machine as shown below.Remove the extension table and open the shuttle cover on the front of the free arm. Take the bobbin case out of the shuttle race by opening and pulling the latch. If the problem persists, the following checklist may help improve the operation. You may have to take or send the machine to be repaired or wish to move the machine. If you do not pack it properly, or do not use the right packing material, the machine could be damaged.
