Canon brand peripheral equipment and software which may be distributed with, or factory loaded on, the Equipment, are sold AS IS without warranty of any kind by Canon USA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such nonCanon brand items is given by the manufacturer or producer thereof. If the Equipment contains a hard disk drive, Canon USA recommends that data stored on that drive be duplicated or backed up to prevent its loss in the event of failure or other malfunction of such drive. Canon USA shall have no responsibility under this limited warranty for use of the Equipment in conjunction with incompatible peripheral equipment and incompatible software. In order to obtain warranty service, contact the authorized Canon retail dealer from whom you purchased the Equipment or call the CANON INFORMATION CENTER AT 1800OKCANON. You will be directed to the nearest service facility for your Equipment. This Limited Warranty covers all defects encountered in normal use of the Equipment and does not apply in the following cases This warranty does not cover units sold to rental firms, military operations, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. These uses are covered only by such specific warranty as Canon may issue with such sales. This Limited Warranty does not apply to accessories or consumables for the Equipment, which are sold "AS IS", without warranty of any kind by Canon USA. Please retain this warranty card and your Bill of Sale as a permanent record of your purchase. This card is most important in order to be sure you are contacted right away should there be a safety inspection, modification or product recall under applicable laws or regulations. Visit the Canon Online Store This allows for uninterrupted recording of your special events and keeps your batteries ready to go. The cable connects to your camera and to the USB port on your PC or MAC Computer. Comes standard with the EOS 1Ds Mark III, 1D Mark IV, 1D Mark III, 1Ds Mark II, 1D Mark II N, 1D Mark II, 5D Mark II, 7D, 5D, 50D, 40D, 30D, 20D, 10D, Digital Rebel XTi, Digital Rebel XT and Digital Rebel. Please see Compatibility tab for compatible models. This case can be conveniently carried by hand or via the comfortable shoulder strap, providing convenient handsfree protection. The SCA50 Soft Carrying Case, the professional looking option, is made with genuine leather. The Adapter can be used with a power supply between 100 and 240 V AC. For areas where 120 V AC power is not used, you will need a special plug adapter. Please read this manual carefully before you use the camcorder and retain it for future reference. Should your camcorder fail to operate correctly, refer to the Troubleshooting table 110. Operating Modes Switch. Write down the number and other information here and retain this book as a permanent record of your purchase to aid identification in case of theft. Operating mode 6, Zoom . Charge the battery pack before use. Attaching the Battery Pack 1. Turn the 2. Open the LCD panel. You can keep the battery pack attached; the battery power will not be consumed. 1. Turn the switch to 2. We recommend that you prepare battery packs 2 to 3 times longer than you think you might need. Remove the memory card. 4. Close the cover. Before using them, make sure to initialize all memory cards with this camcorder 85. Memory cards have front and back sides that are not interchangeable. Inserting a memory card facing the wrong direction can cause a malfunction of the camcorder. When using a battery pack, the camcorder retains the setting even if you change the position of the The battery usage time shortens when the LCD screen is set brighter.

A different set of languages will be available with your camcorder, depending on the area where you acquired it. Language Set A German, English, Spanish, French, Italian, Polish, Russian,. Just set the time zone to the one of your destination, and the camcorder automatically adjusts the clock. If necessary, clean the video heads 1. Holding the lock button on the switch pressed down, set the switch to CAMERA. Approximately 30 seconds before the camcorder shuts off the message " OFF" will appear. If the camcorder shuts off, turn the and back on again. The camcorder rewinds the tape, plays back the last few seconds, and returns to record pause mode. Record Search In record pause mode 1. Doing so could result in data damage. Card Access Display " " appears and the " " display moves to indicate that the camcorder is writing on the memory card. Remaining Card Capacity for Still Images flashing in red No card in green 6 or more images. If necessary, support the camcorder with your left hand. Be careful that your fingers do not touch the microphone or lens. The picture may become distorted during some special playback modes. The camcorder stops the tape automatically after 4 minutes 30 seconds in playback pause mode to protect the tape and video heads. towards. Doing so could result in data damage. The sound will be muted when the LCD panel is closed. Available in the Speaker SPEAKER VOLUME 1. Press the FUNC. button to open the FUNC. menu. Available only in the MENU 1. Press the FUNC. button to open the FUNC. menu. Connect the white plug to the white AUDIO terminal L left, the red plug to the red AUDIO terminal R right and the yellow plug to the yellow VIDEO terminal. Easy mode The camcorder adjusts focus, exposure and other settings automatically, allowing you to just point and shoot. Snow Use this mode to record in bright ski resorts. It prevents the subject from being underexposed. Check the image on the screen. The picture may not appear smooth when played back.

Fireworks To avoid camcorder shake, we recommend using a tripod. Use a tripod when recording in mode as the shutter speed slows down. With the shoot as in mode, however, you have the option of changing some settings. Available only in the. Fast Moving Through dirty or Subjects. Do not point the LED light at persons while they are driving. Use commercially available condenser microphones

with their own power supply. MIC terminal You can connect almost any stereo microphone equipped with a but the audio level will be different than with the builtin microphone. Default settings are in boldface text. For details on each function, see the reference page. Menu Items Recording PROGRAM AE, SPORTS, programs BEACH, FIREWORKS White balance AUTO, SET Image effect. The camcorder retains the custom white balance setting even if you turn it off. IMAGE EFFECT OFF Records with no effect. VIVID NEUTRAL SOFT SKIN DETAIL Available only in the IMAGE EFFECT OFF 1. Set the mode switch to 2. Press the FUNC. button to open the FUNC. menu. 3. Faders Begin or end scenes with a fade to or from black. Fade Trigger FADET Corner Wipe CORNER Flip FLIP Zigzag ZIGZAG Tide TIDE Wipe WIPE Jump JUMP Puzzle PUZZLE Beam BEAM The availability of the various Digital Effects depends on the operation mode. Select it, close the menu and continue directly to step 4 below. The camcorder retains the setting even if you turn it off or change the recording program. However, you need to select again the still image to be used with the Card Mix effect. When the digital zoom is activated, the camcorder will switch automatically to the digital zoom when you zoom in beyond the optical zoom range. TV SCREEN Shows the camcorder displays on a connected TV screen. You can also use the TV SCREEN button on the wireless controller. STARTUP IMG Sets whether the Canon logo will be displayed or not when you turn on the camcorder.

POWER SAVE When powered by a battery pack, the camcorder shuts off to save power if left without any operation for 5 minutes. If a higher file number already exists on the memory card, the consecutive number will be assigned. This is useful for organizing images on a computer. However, you can turn off the wind screen when recording indoors, or when you want the microphone to be as sensitive as possible. When you play back a tape, you can display the data code and select the data code combination you wish to display. Available in the Joystick FUNC. Available only in the 1. The symbol of the current setting is displayed. 3. Select the still image size. The size of the still image will be S 640 x 480. The image quality can be selected. AiAF Depending on the shooting conditions, one or more AF frames out of the 9 AF frames available will automatically be selected and focused Center Of 9 AF frames, the center one is selected to focus. This is convenient for making sure the focus is exactly where you want it. Three still images in different exposures are recorded to the memory card. Make sure that there is sufficient space on the memory card. Available only in the Zoom lever Joystick Joystick. Be careful when erasing images. Erased images cannot be recovered. Protected images cannot be erased. Movies can only be erased when the first scene is displayed as a still image. Erasing a Single Image Available only in the 1. If a memory card is initialized, all still images and movies, even protected ones, will be erased permanently. Movies can only be protected when the first scene is displayed as a still image. Protecting during Single Image Playback Available only in the PROTECT OFF. The card initialization will take a moment. Press the FUNC. button to close the menu. mode. INITIALIZE. You can also record the input video as a movie or still image on a memory card. We recommend powering the camcorder from a household power source.

The data code of the image will reflect the date and time it was recorded on the memory card. You can also record the input video as a movie or still image on a memory card. Blank sections may be recorded as anomalous picture. If the picture does not appear, reconnect the DV cable or turn the camcorder off and back on again. Do not connect any devices to the camcorder's USB terminal. The DV terminal serves as output terminal only. Connecting the camcorder to the computer you can also use the analogdigital conversion to transfer analog recordings to your computer as digital signals. The sound quality of the audio dubbed will deteriorate when you audio dub a tape that was recorded with a different camcorder or when you audio dub the same tape more than 3 times. Available only in the Recording a Movie from the Tape 320x240 1. Selecting the movie size Press the FUNC. button. Select by a setting option and press the FUNC. You can use the print order settings for direct printing of still images recorded on the memory card Canon printers SELPHY CP, SELPHY DS and PIXMA printers. Connecting the Printer to the Camcorder Open the LCD panel 1. You can also

use this camcorder to transfer through it recordings from an analog VCR or 8 mm camcorder to your computer using the USB terminal see Converting Analog. If the problem persists, disconnect the DV cable, turn off both the camcorder and the computer and then turn them back on and reconnect them. From the second time on, you will only need to connect the camcorder to the computer to transfer images. Do not connect a USB or DV cable to the camcorder while setting the transfer orders. Available only in the TRANS.ORDER OFF. If you have a problem with your camcorder, refer to this checklist. Consult your dealer or a Canon Service Center if the problem persists. Power Source Problem Camcorder will not turn on. The camcorder switches off by itself. Replace the battery.

Video noise appears on When using the camcorder in a room where a plasma TV is screen. Image is protected. Cancel the protection. Card error occurred. Turn off the camcorder. Remove and reinsert the memory card. Initialize the memory card if flashing persists. Solution 1. When condensation is detected The camcorder stops operating and the warning message "CONDENSATION HAS. No images are recorded on the memory card. A memory card error occurred. The camcorder cannot record or play back the image. The error may be temporary. If the message disappears after 4 seconds ". Consult your dealer or a Canon Service Center listed in the Contact List provided with the printer or the printer manual to replace the waste tank waste ink absorber. If the error persists, consult your dealer or a Canon Service Center listed in the Contact List provided with the printer or the printer manual. Do not point the lens or viewfinder at strong light sources. Do not leave the camcorder pointed at a bright subject. Rewind tapes from time to time if they are stored for a long time. Do not leave the cassette in the camcorder after use. Do not use spliced tapes or nonstandard cassettes as they may damage the camcorder. Image data may be corrupted or lost due to memory card defects or exposure to static electricity. Canon Inc. makes no warranties for corrupted or lost data. You can also obtain genuine accessories for your Canon camcorder by calling 18008284040, Canon U.S.A. Information Center. Use of genuine Canon accessories is recommended. This product is designed to achieve excellent performance when used with genuine Canon accessories. This mark identifies genuine Canon video accessories. When you use Canon video equipment, we recommend Canonbrand accessories or products bearing the same mark. Exif Print is a standard for enhancing the communication between camcorders and printers.

By connecting to an Exif Printcompliant printer, the camcorder's image data at the time of shooting is used and optimized, yielding extremely high quality prints. The limited warranty is only effective upon presentation of your Bill of Sale or other proof of purchase. Labour For a period of one year from the date of original purchase, labour will be provided free of charge by our Canon Service Facilities in Canada.
