Book Descriptions:

canon rebel d300 manual

EOS M and EOS R Full Frame mirrorless ranges deliver the power of DSLR in the body of a compact camera. Register your product and opt in for exclusive offers and discounts. Check that the images are properly recorded on the CF card. If the camera or CF card is faulty and the images cannot be recorded or read by a personal computer, Canon cannot be held liable for any loss or inconvenience caused. Doing so may cause fire or a health hazard. If the product does not work properly or requires repair, contact your dealer or your nearest Canon Service Center. If the camera gets wet, take it to your nearest Canon dealer as soon as possible. If small amounts of water splash onto the camera, wipe it with a clean dry cloth. If the camera is exposed to salty air, wipe it thoroughly with a slightly damp cloth. If this happens, use a CF card made by Canon. Y Full Auto p.38 Allows you fully automatic shooting—the camera makes all the settings. Image Zone Allows you fully automatic shooting in specific. Attaching the Strap Pass the end of the strap through the camera's strap mount from the bottom. Then pass it through the strap's buckle as shown in the illustration. When not using the camera, remove the battery and attach the protective cover to prevent shorting. Battery Pack BP512 can also be used. Battery Level Icons The level of charge remaining is shown in three stages when the Power switch is set to. Do not connect or disconnect the power cord while the cameras Power switch is set to. It cannot be attached to other EOS cameras.To turn on the camera again, just press the shutter button. Camera shake can cause blurred pictures.Basically, you look at the LCD monitor and use the button, button, Cross keys, and button to proceed to the next step.. To turn off the menu, press the button again.Each captured image is recorded with the date and time it was taken. If the date and time are not set, they cannot be recorded correctly. Make sure you set the date and time correctly.

Replace the battery with a new CR2016 lithium battery as described below.Note that the image sensor is a very delicate component. If possible, you should have it cleaned by a Canon Service Center. While you clean the image sensor, the camera must be turned on. Use the AC Adapter Kit ACKE2 optional accessory, see page 128 or a battery. If the camera's dioptric adjustment still cannot provide a clear viewfinder image, using Dioptric Adjustment Lens E 10 types is recommended. In these modes, all you do is point and shoot. In addition, to help prevent mistakes caused by operating the camera improperly, the. Everything is automatic so it is easy to photograph any subject. With seven AF points to focus the subject, anyone can just point and shoot. AF point Shutter speed Aperture value. For the functions available in the Basic Zone modes, see the "Function Availability Table" p.122. Portrait Landscape Closeup This mode blurs the background to make. In the or mode, use a tripod if the shutter speed display blinks. Programmed Image Control Modes This is for fastmoving subjects when you want to freeze the action. We recommend using a tripod when you use the selftimer. Do not stand in front of the camera when you press the shutter button to start the selftimer. Doing so prevents the camera from focusing on the subject. After taking one shot, wait until the access lamp turns off before taking another shot. To prevent this, use the eyepiece cover attached to the neck strap to cover the eyepiece. Remove the eyecup. For Basic Zone modes, only the imagerecording quality except , file numbering, auto rotation, and camera setting checking will

apply in this chapter. Images captured in the format must later be processed by a personal computer.The actual image file size and the CF card's maximum capacity varies depending on the subject, shooting mode, ISO speed, and processing parameters. A higher ISO speed number indicates a higher sensitivity to light.

Therefore, a high ISO speed is suited for moving subjects or shooting in lowlight conditions. With a digital camera's white balance setting, you can compensate for the color temperature so that the colors in the image look more natural. By selecting this image, you import its white balance data for the white balance setting.The processing parameters can be set according to the preset Parameter 1, Parameter 2, and Adobe RGB. Or they can be set to Set 1, 2, or 3 that you can set yourself. You can register and save up to three sets of processing parameters. Parameter Contrast Sharpness. The file number is akin to the frame number of film images. If a vertical image is taken while the camera is pointed up or down, the image might not rotate automatically for playback. Camera Setting Information CF card remaining capacity Auto power off time p.30 For viewing image with shooting information during playback, see "Image with Shooting Information". You take control of the camera.The AF point can be selected automatically by the camera or manually by you. In the Basic Zone modes and mode, the AF point selection is automatic only. In the,,, and. Select the desired AF point. When the internal memory becomes full during continuous shooting, ". The camera automatically sets the shutter speed and aperture value to suit the scene's brightness.This is called ShutterPriority AE. A fast shutter speed can freeze the motion of a fastmoving subject and a slow shutter speed can blur the subject to give the impression of motion. Turn the dial to set a slower shutter speed until the blinking stops. Turn the dial to set a faster shutter speed until the blinking stops. This effect is ideal for portraits.The aperture display will differ depending on the lens. When no lens is attached to the camera, " " will be display for the aperture value.To determine the exposure, refer to the exposure level indicator in the viewfinder or use a handheld exposure meter. This method is called manual exposure.

It is effective for group photos and landscapes. The camera uses the seven AF points to detect the nearest and farthest subjects to be in focus. You can make the image look lighter increased exposure or darker decreased exposure.After locking the exposure, you can recompose the shot while maintaining the desired exposure level. This feature is useful for backlit and spotlighted subjects. In Creative Zone modes, partial metering will be used automatically for AE lock. Bulb is useful when a long exposure is necessary for capturing night scenes, fireworks, the night sky, etc. Since bulb exposures will have more noise than usual, the image will look rough or grainy. Using the Builtin Flash in the Creative Zone When using a Creative Zone mode, press the. The camera's redeye reduction feature turns on the redeye reduction lamp to shine a gentle light into the subject's eyes to narrow the pupil diameter or iris. It works in Creative Zone modes. If the subject is too far away and beyond the effective range of the flash, the Evaluative metering This is the camera's standard metering mode suited for most subjects even under backlit conditions. After detecting the main subject's position, brightness, background, front and back lighting conditions, camera orientation horizontal or vertical, etc., the camera sets the proper exposure. Images not taken with the camera The camera might not be able to properly display images captured with a different camera or edited with a personal computer for image processing or changing the file name. The horizontal axis indicates the brightness level darker on the left and brighter on the right, while the vertical axis indicates how many pixels exist for each brightness level. Display the image to be magnified. Jump bar Jumping in the singleimage, image information, and magnified view modes Press the key to jump ten images backward, or press the key to jump ten images forward.

Always turn off the camera and the television before connecting or disconnecting them. Be sure the camera is set to the video system format NTSC or PAL compatible with the TV set. Only protected images will not be erased. Once an image is erased, it cannot be recovered. So be careful when

erasing an image. To prevent important images from being erased accidentally, protect it. Make sure you no longer need the image before erasing it.In such a case, format the CF card with the camera first. Then it might work with the camera. Use another CF card instead. Or, if you have a commerciallyavailable CF card reader that can read the CF card, use it to transfer the images in the card to a personal computer. The direct printing operation is all done with. You do all the printing operations with the camera. Images in the h format cannot be printed directly from the camera. Connected printer icon Print setting screen Trimming frame Appears when you want to trim the image. The button toggles between the vertical and horizontal image orientation.If multiple prints are being printed, the printing will stop after the current print is finished printing. The printing options give you a choice of making an index print multiple, thumbnail images on one print, inserting the date, and inserting the image file No. The printing options will apply to all the images selected for printing. Exit the set up screen. Press the keys to set the number of copies from 1 to 99. If two or more prints are being printed, the printing will stop with the next print. With BJ printers The printing will stop and the paper being printed will be discharged. It covers basic shooting concepts, camera specifications, system accessories, and other reference information. When focus is achieved, it is locked. With evaluative Single metering, the exposure setting is also locked. The exposure setting is stored in memory before the shot is taken. The above conditions. Attach the battery properly to the charger.

Set the correct date and time. p.32 "No image appears on the TV screen.". Jot down the "xx" error code and take your camera to the nearest Canon Service Center. If an error occurs after you shoot, the camera might have missed the shot. AC Adapter Kit ACKE2 Power source kit AC adapter, DC coupler, power cord for supplying power to the camera with a household power outlet. A shutterrelease lock is also provided. CF Card Data storage device where the captured images are recorded. CF cards made by Canon are recommended. Single image or all images in the CF card can be erased except protected images. Canon card photo printers and BJ printers for direct printing from the camera JPEG images Print quantity, style image, paper, borders, date,. The cable with the ferrite core provided with the digital camera must be used with this equipment in order to comply with Class B limits in Subpart B of Part 15 of the FCC rules. strap through the camera's strap mount from the bottom. Then pass it through the strap's buckle as shown in the illustration. Pull the strap to make sure it does not slip out of the buckle.

Before using the camera again, be sure to recharge the battery. After the red lamp lights, continue to r. The pages are then spiral bound with a clear acetate front cover and red card back cover, held together with a strong white wire. Your manual will lay flat when open and will last for as long as your camera, with a little bit of care. Manuals over 400 pages long may be supplied as more than one book.This camera is also known as USA. EOS Rebel Japan EOS KISS Digital. This advanced technology works in concert to realize outstanding image quality and definition, and more natural color reproduction to satisfy the requirements of a broad user base. The EOS Kiss Digital offers advanced shooting features, including a highspeed 7point wide area autofocus AF with focusing points superimposed in the viewfinder, making accurate framing simple; Continuous Shooting at approximately 2.5 frames per second for a burst of up to four shots; and the ability to record JPEG images in one of six formats or as a 12bit RAW file. Employing highdensity mounting technology and a new chassis and outercasing configuration with fewer parts, the Canon EOS Kiss Digital realizes the smallest and lightest body in the EOS DIGITAL series, measuring just 142 w x 99 h x 72.4 mm d and weighing only 560g. In addition to compact proportions, the camera's design contributes to outstanding usability, concentrating such operating controls as the mode dial and electronic dial on the righthand side for onehanded operation of most shooting functions. Moreover, for the first time in the series, the EOS Kiss Digital incorporates a crossconfigured controlbutton layout that works with a simple "tab" style menu layout to enable easy control of shooting, playback and camera settings without having to scroll. The EOS Kiss Digital is compatible with the PictBridge industry standard for the direct printing of photos from digital cameras.

As a result, users can connect the camera directly to any printer enabled for PictBridge, regardless of brand, and output photos JPEG without having to use a computer. Manual Enabled with AE lock button. No AE lock in Basic Zone modes. Text and images copyright c 2006 JanErik Skata. All rights Obviously it This turned out to be a relatively common failure on the 300D, more No warranty, it is 2,5 years old and bought BluTack, but then it of course lost autofocus capability. I contacted a service workshop, and got a price estimate of around 200 On discussion forums I got to know that the failure is only due to a So I set to This document not intended as an instruction manual. I take no responsibility for damage caused by performing theseThis will undoubtedly void your warranty. Side cover removed. Back cover removed And the front cover off. On the right side of the lens mount, beneath WARNING The large capacitor holds around 300 Flash power supply board removed from its mountings. This would be easier by loosening the top cover, but that requires Here is visible in the left picture where the broken pin has been. On the right picture, the actual culprit. New pin fabricated out of steel wire, then glued into place with super Story could have ended here. I assembled the camera, up to the point where I had the back cover Put the batteries in, and turned it on. Everything was working perfectly. Assembled the rest, and switched it on again. This time completely Disassembled it completely twice, cleaned all ribbon cable contacs with Still no action. I started suspecting ESD damage, until I found a comment about fuses. Bottom, with the steel plate for the tripod mount removed. The red rectangular area under the lens mount is the AF sensor assembly.Only the middle fuse was burned larger arrow. There are already Assembled it completely this time and insert the batteries. Nervously The boards are live as soon as it has the main battery in.

I have really learned a lot about the Digital Rebel from this, and I. References IR Filter Removal Modification and Peltier Cooling Plans by Gary. Honis 300D parts diagram and service manual Canon. That is that we were disappointed to seeNote that the EOS 300D does not provideAdditionally the current camera settingsThe first crop is from a JPEG straight from theIn the example below you can see that a largeYou can select a KelvinI can confirmEven at ISO 1600 images

are relativelyShooting at ISO 100 delivers the silky smoothThis camera is aimed squarely at the PS crowd. Like 1 Dec 17, 2014 permalink reanim888 The camera has a rotation sensor which allows automatic rotation of images. This is a very important feature lacking on other far more expensive cameras. Im unsure if the images themselves are rotated, which saves a lot of time in postproduction, or if just the previews are rotated, which is a lot less useful but still far better than the Nikon cameras I use like the D1H. I can manually rotate images inside my Canon A70, but this only applies to the preview. With the A70 I still have to rotate in post. Like 2 Oct 19, 2014 permalink Charlie Medina I purchased an EOS 300D in Bath, 2003, their first EOS product as I had been stolen my professional NIKON in Liverpool. It isnt too bad and using Photoshop you are able to improve pictures quality. My God! CANON forget old customers.Read our full review to see why its got the best autofocus system weve ever seen. 716 Olympus OMD EM10 Mark IV initial review first impressions Aug 4, 2020 at 0600 The Olympus OMD EM10 IV is the companys entrylevel DSLRshaped mirrorless camera. While it has a higher resolution sensor and new processor, its biggest focus is on selfies. 2258 Sony a7S III initial review Jul 28, 2020 at 1400 The Sony a7S III is a 12MP fullframe camera primarily designed with video in mind.
