The steamers are simple to operate and provide an alternative to ironing if your garments are made from delicate fabrics, or if you do not have room for an ironing board. The steamers are designed to use regular tap water, but bottled water can be used if your water is very hard. Do not fill past the fill line. Plug in the steamer and face the unit away from the door. Hang the steamer head on the door hook. This may take up to twoandahalf minutes. Hold the steam head in one hand and press it lightly onto the top of the garment. Turn the garment around and repeat the passes over the back of the garment. Turn the unit off and allow it to cool completely before putting it away. The extralarge, 128ounce transparent tank is designed for commercialgrade output, so you can

steam a closetful before refilling. It locks into place when in use and unlatches simply for removal. A convenient swivel hanger atop the sturdy aluminum pole supports garments while you're steaming and the hose head between uses. Two included brush attachments open fabric and upholstery weave for better steam penetration, and Rowenta also throws in a lint brush. Other nice details include a footoperated power switch, a ready indicator light, maneuverable casters, and automatic shutoff for safety. Emily Bedard To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. I can see how others have been discouraged its like learning to iron all over again but in the end it is so much easier and quicker. I just finished steaming a Queen sized duvet cover and sheet sets and they look better than when they return from the dry cleaner. The great part is it steams through so you only have to do one side. Use a cheap plastic cutting board for smoothing hems and ends of fabric just hold the board vertically beneath your fabric, press the steamer head flat against the board and listen to it hiss as it presses it to a completely smooth edge. Shirts use the pole and hang shirt on a hanger with a swivel head the swivel allows you to turn the shirt from back to front easily for collars use your towel roll to insert under collar this helps to shape the collar. Use the cutting board to flatten the sleeves nicely. Highly recommended for linen clothes that don't yield to a normal iron. Pants like khakis and shorts, use the pole, take the skirt hanger pin the pants upside down with seams together pins on each crease side.

When you are done with one side just swivel your hanger on the pole to other side in one easy motion. Then steam inside of crease to the inseam. straw hats or baseball hats that have become misshapen use your paper towel roll to shape and taa daa! Works like a charm on carpet indentations. My next project is I'm going to try to use the steamer as those scunci steam cleaners are advertised. I'm going to use it on our grill and oven racks. Warning, careful of burns. Don't hold your hand too near the iron as you pull fabric taut even below the steam will flow down and scald you. Use your clothespins to grab fabric and prevent burns. I'm thinking of using tongs with rubber bands wrapped around the ends to grip. Hope this helps! I would love to hear any different tips!. Since I wear linen every day during the spring and summer, the Rowenta came in handy. It heats fast, has a strong spray of steam and can be used on the most sensitive garments. The only drawback for me was the swivel pole. I think I would prefer that it have the option of being higher. It also took me a while to adjust to the rotation of the pole. All in all, it's still worth the purchase. Since I use it so often, only time will tell how long it continues to operate. But then, I'd just buy another one. At first I thought I am just sensitive due to my pregnancy but no no no. The burnt plastic smell lingers in the air for hours. If I ever have to use it myself I'll do so in the yard. It is not easy to iron the collar and the sleeves. Only good for something like a large piece of cloth maybe. Don't recommend it to anyone. Just wonder why it is not discontinued. I was extremely tempted by the very reliable Jiffy but could not quite justify the price for their pro model. So, I took a stab at the 7800. Its wattage is identical to the Jiffy, meaning, its steaming power is equal. The water tank heats up as described and the steam exudes wonderfully. The extra attachments are nice perks.

I mean, who designs these things Try hanging a pair of pants with 34 inseam and go to town steaming. Like with any other steamer, when you lower the handle down too far, the gurgling starts. You have to straighten the hose and elevate the handle in order to free condensation build up. What is wrong with making a sectional pole that's adjustable to 6 feet Duh. Other than that, don't hesitate to purchase this product, ladies and gents. You'll be delighted with it. They are in Miami; I'm in L.A.. I suggest purchasing from them because Rowenta offers only a 1 year warranty. Go through smallappliance.com and they'll throw in a free extra year warranty. And, uh, by the way, shipping is free. Only took about 5 days to get my product. Cheers. Veuillez vous adresser a nos Revendeurs en

Failure to follow these directions will void the product warranty. **WARNING Risk to Children and Impaired Persons** Supervision is required during the installation, operation, cleaning and maintenance of this product by children under age 12 and anyone with reduced physical, sensory or mental capabilities. Children should be supervised to ensure that they do not play with the appliance, its parts and packaging material. Directions to reduce risk of fire, electrical shock, and injury

1. Read all instructions before use.
2. Use caution when handling this steam unit. Burns could occur from touching hot metal parts, hot water, or steam. Use special care to avoid contact with hot water when turning the product upside down to empty the reservoir.
3. To reduce the risk of contact with hot water, test whether steam is ready before each use while carefully holding the product away from your body. If no steam appears, wait a few more minutes and test again. Do not look into the appliance, use your hands or other objects to check for steam.
4. Do not leave appliance unattended while connected.
5. To reduce the risk of electric shock, do not immerse the appliance in water or other liquids.
6. Always disconnect appliance from electrical outlet when filling with water or emptying, and when not in use.
7. Do not allow cord to touch hot surfaces. Let appliance cool completely before putting away. Loop cord loosely around appliance when storing.
8. Never yank cord to disconnect from outlet. Instead, grasp just the plug and pull to disconnect.
9. Do not operate appliance with a damaged cord, or if the appliance has been dropped or damaged. To reduce the risk of electric shock, do not disassemble or attempt to repair the appliance. All repairs must be performed by a qualified service professional. Incorrect reassembly or repair could cause a risk of fire, electric shock, or injury when the appliance is used.
- 10.

<http://drbillbaker.com/images/business-dynamics-sterman-instructor-manual.pdf>

A loose fit between wall outlet receptacle and plug may cause overheating and distortion of the plug. Discontinue use of the product in this outlet. Contact a qualified electrician to replace loose or worn outlets.

11. To reduce the likelihood of circuit overload, do not operate another high wattage appliance on the same circuit.
12. If an extension cord is absolutely necessary, a 15 amp rated cord should be used. Care should be taken to arrange the cord so that the cord cannot be pulled or tripped over.
13. This GARMENT STEAMER is for use with a 120 volt electrical outlet. The cord has a plug as shown at A in Figure 65.1. An adapter, as shown at C, can be used to connect threeblade groundingtype plugs to twoslot receptacles it is not included with your product. The green grounding lug extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to contact Steamfast Consumer Service at 18007116617. Carefully inspect packaging material as some parts are shipped inside Styrofoam packaging. To obtain possible missing parts,

refer to the Consumer Support section on page 10 of this manual. It will automatically stay in lifted position. 4. Pull Water Reservoir out. Note that Water Reservoir cannot be completely removed from unit; do not attempt to force it free. 5. Remove Water Reservoir Cap to expose Water Reservoir fill hole. 6. Using Measuring Cup included, fill Water Reservoir up to the MAX 300 ml. line with distilled water. 7. Replace Water Reservoir Cap and push filled Water Reservoir back into main unit. NOTE that it is best to start with the most delicate fabrics first, as higher levels of heat will cause damage to Nylon and Silk. Pressing Indicator Light will illuminate. 3. A few minutes of heating time will be required to reach selected temperature.

Once Pressing Plate is heated, Pressing Indicator Light will deactivate. You are now ready to begin pressing. 4. Lay fabric flat on Ironing Board. FIGURE 1 5. If pressing wool, you may choose to spray with a burst of steam. This function is available once Steam Burst Ready Indicator Light illuminates. NOTE Do not activate burst of steam with unit completely closed, as this may damage unit. Best results are obtained if Pressing Plate is held open approximately 3 in. 75 mm. above Ironing Board before pressing Steam Burst Button. For safety reasons, do not hold Pressing Plate open more than 3 in. 75 mm. when using steam burst function. Only use burst of steam for 23 seconds for best results. If press is left on fabric for more than 10 seconds, it could result in damage to the fabric. NOTE When using the nylon or silk settings, no steam is produced. 6. To press, lower Pressing Plate gently onto fabric and Ironing Board. Hold there for 810 seconds, then lift up Pressing Plate. Repeat until you have achieved desired crease and smoothness. Note If press is left on fabric for more than 10 seconds, it could result in damage to fabric. 4. Repeat steps 13 above until fabric is smooth and wrinklefree. **PRESSING AND STEAMING TIPS Pressing Shirts and Blouses** 1. Place shoulder yoke on Ironing Board first and press. 2. Next, place sleeves onto Ironing Board with fold parallel to long seam and press. 3. Place cuffs onto end of Ironing Board and press. 4. Place bottom of shirt behind Ironing Board. Begin by pressing the side with pocket. Pull shirt towards you as you press each section. 5. Finish by pressing collar of shirt. **Pressing Pants** 1. Place Pressing Cushion under waistband and press, repositioning waistband until completely pressed. 2. To press inseam, place Pressing Cushion under area to be pressed. 3. Place pleated area on Ironing Board. Carefully fold pleats and press. 4.

Embroidery should be placed face down on Ironing Board to reduce wear and prevent damage to delicate areas. Pull fabric towards you, over Ironing Board, and lower Pressing Plate. Press fabric in sections until completed. These multiple function safety features deactivate electrical power to the heater when the Pressing Plate has been left in closed position against the Ironing Board for more than 10 seconds. Heater deactivation is signaled by a beeping sound. Heater functionality is restored when the Pressing Plate is lifted back up. Power to the heater will also be cut if the Pressing Plate is left in the lifted position without use for approximately 15 minutes signaled by a continuous beeping sound. **IMPORTANT** Auto ShutOff does not mean that power to the unit is totally cut off. **CLEANING THE DIGITAL FABRIC STEAM PRESS** 1. Fill Water Reservoir with water using procedure on page 6 of this manual. 2. Place Pressing Cushion in the middle of Ironing Board. 3. Place a clean towel over Pressing Cushion and Ironing Board. 4. Set Temperature Control Buttons to the highest setting **LINEN**. 5. When Steam Burst Ready Indicator Light illuminates, lower Pressing Plate onto Pressing Cushion. 6. Press Steam Burst Button six times. 7. Allow Pressing Plate to cool. 8. Clean Pressing Plate with damp cloth. Do not use abrasive materials, as this may damage Pressing Plate. 9. Ironing Board fabric cover is removable for cleaning. Hand wash only with mild detergent. Power Indicator Light DOES NOT illuminate. Unit is not plugged in. Plug power cord into electrical outlet. If you need assistance, contact a licensed electrician. Unit heats up, but fails to steam. Power Indicator Light does illuminate. Auto ShutOff has engaged. Refer to Auto ShutOff section on page 8 of this manual for proper procedure. NOTE Always allow proper time for unit to heat up and begin producing steam. Water Tank is empty. Refer to Filling Water Reservoir procedure on Page 6. Unit is damaged or malfunctioning.

Immediately cease usage and contact our Customer Support department. Steam Burst output is weak or intermittent. Pressing Plate needs to be cleaned. Refer to Cleaning the Digital Fabric Steam Press section on page 8 of this manual for proper procedure. Additional inquiries should be directed to our consumer support services through our Web site, www.steamfast.com. If you do not have internet access, you may also contact our Consumer Service Department by telephone, at 18007116617. Do not operate any appliance with a damaged cord, plug or steam hose or after the appliance malfunctions, or is dropped or damaged in any manner. Before using any of the accessories on upholstery or garments, be sure to consult the manufacturer regarding their recommendations. Remove it by pressing on the release button on top of brush while pulling it forward. Remove it by pressing on the release button on top of brush while pulling it forward. Warning Never touch the steam head until it cools completely. The unit should be descaled at least once a year or every 100 hours of use.

Unplug the unit and remove water container from main unit by releasing container lock and pulling up. In any way cant Lastmanuals be held responsible if the document you are looking for is not available, incomplete, in a different language than yours, or if the model or language do not match the description. Lastmanuals, for instance, does not offer a translation service. While this certainly holds true, actually using a garment steamer doesn't have to be any more difficult than using an iron. In fact, you'll likely find it easier once you get the hang of it. While each steamer's tank takes on a different shape and is located in a different area of the unit, finding it should prove easy. When in doubt, check the manual. Using the steamer before its ready won't be hazardous, though it may be a bit of a timewaster. Pull the steamer's trigger and see how much steam comes out. Once the level of steam stays consistent over the course of two pulls a minute apart, it's safe to assume it's reached a full steam. Check with the instructions to see how long it takes to heat up, as this will give you some indication as to when you should start checking. Of course, it will remove wrinkles from any piece of fabric it comes in contact with. Because steamer heads aren't as smooth as iron bases, you'll likely find it much easier to go from top to bottom when steaming your clothes, as opposed to running the head in circles or going up and down. Depending on the steamer you use, you may find it leaves clothes a lot wetter than an iron. After the clothing in question dries, you're all done! The below tips; however, will make the process go a whole lot smoother, saving you time and headaches while still coming out with the perfect end result. Certain fabrics can only take so much abuse before falling apart. On the other hand, there are fabrics which require a whole lot of power before they become wrinklefree. Thick denim jeans will require much more heat than some silk underwear.

As a general rule of thumb, you should use only the highest heat setting you need to effectively remove wrinkles. Going any higher may only prove to hurt your fabrics. Much like a kettle or a coffee machine, adding more water than you need will do nothing other than slow you down. If you plan on steaming a shirt or two, don't bother filling the tank all the way up. This way, it will heat up faster. Don't feel as if you have to steam on a flat surface. Many commercial establishments will typically steam clothes while they are hanging up. An ironing board is far from necessary and may be downright impractical. Please turn it on so that you can experience the full capabilities of this site. With up to 15 minutes of continuous steam, you can freshen up garment after garment without having to stop and refill the water tank. Includes accessories for delicate fabrics, heavier fabrics, lint removal and more. I am a newbie to using a fabric steamer, but I will never go back to ironing again. I had originally wanted a fabric steamer to steam my daughters prom dress, but Ive been using it like crazy throughout my home. It is easy to use and store and heats up very quickly, which is fantastic when youre a single mom in a hurry. What I love most about it is that I can use it freshen up throughout the house, Sanitize mattresses, freshen up drapes and even couch cushions. I am so happy that I received this sunbeam fabric steamer to try in my own home and review. I definitely give it five stars. I love it! I had in my head what I thought a steamer could actually do compared to

what an iron could do. I really really did not think this would work as well as my iron but boy was I wrong. The steamer has quickly become my new up session I find myself wanting to get the wrinkles out of EVERYTHING lol. The neat heated bar on it makes it press out the wrinkles effortlessly who the steam makes it look brand new. I highly recommend!!

I did receive this product free in the mail to review but its worth every penny and I would buy it in the store if something were to happen to mine! Although I first felt it was kinda bulky and I wasn't able to get the right grip on it, its now grown on me now that Im comfortable with it. The lock on the steam button makes it easy to use. It pours out a lot of steam. The perfect amount to get the wrinkles out. Very happy with how hot it gets too. You could very easily burn yourself if youre not careful. I didn't think it would be as powerful as a regular iron, but I was wrong. It holds a lot of water too so I don't have to refill it during usage. I think this will be a product that I can't live without from now on. The steamer is nice and compact and produces a good amount of steam. I used it to steam wrinkles out of a blouse that had been folded for several months. The steamer got the wrinkles out without any problems. I also used the hot plate like an iron to press the sleeves and was pretty happy with the results. The only real issue I didn't like was that the steam made wet streaks on the shirt but when they dried it didn't leave any marks. It worked pretty good overall on the items I used it on. I received this item in return for my review. I did not get paid for this review. It dewrinkles without ruining clothes. The shape of the steamer makes it easy to hold and the large water capacity helps me steam multiple garments without having to refill. The steamer itself is easy to use with easy to follow instructions. I especially enjoy how quickly it is ready to be used after turning it on. After steaming multiple fabrics I am very happy with this product. The only downfall is that it tends to spit water so if you are in a hurry your clothes may be wet and feel a little damp. Overall I recommend this product and am very happy.
