Once you get the code, you can start using the impressive source in your web pages by including just one HTML code line: Icon 2 Icon 3 Results at: The fa-border, fa-pull-right, or fa-pull-left classes are used for extracciÃ³n citations or art icons. The following ³: Å List itemÅ List itemÅ List item Results at: The fa-spin class gets any icon to rotate, and the fa-pulse class gets any icon to rotate with 8 steps. UPDATE The content picker above selects the entry: input[type="text"]:before. .wrapper input[type="text"] { position: relative; } input { font-family: 'FontAwesome'; } /* Is for placeholder ³ n */ .wrapper-before { font-family: 'FontAwesome'; color:red; position ³: relative; left: -5px; content: "f007"; } Awesome Backup Source uses the Unicode Private Use Area (PUA) to store icons. The and elements are widely used for icons. The following ³: Class = "FAS FA-10X CLOCK"> Results: PruÃ©balo yourself A"List icons The FA-UL and FA-LI classes are used to replace the default bullets in unordered lists. See . It's okay. You can also add larger icon classes to the parent to control even more of the size. If you define a font in input elements, then supply the same font as the failure of situations where we use an icon. Also note that if you change the font size or the icon container color, the icon changes. This tutorial will focus on editing ³ free. We prefer the ³ approach of the kit. The same things go in the shade, and anything else that is inherited using CSS, I like this: Input {Font-family: 'Fontawesome', yourfont; } Font Awesome 5 has a professional edition ³ 7842 icons, and a free edition ³ 1588 icons. Also agreguÃ© the placeholder suggestion ³ where the wrapping is redundant. The S in FAS represent smooth ³, and some icons also have a regular mode, specified by using the prefix Far: Results: PruÃ©balo yourself ÅThe impressive font is designed to be used with elements in line. To use the Free Font Awesome 5 Icons, you can choose to download the increÃble font library, or you can sign up for an account in the increÃble font and get a ³ code (called ³ kit code) to use it when you add an impressive font to your website. Adding a wrapper element and declaring a family-font is one of the possibilities, as it is using a background image. The FA-FW class is used to set icons at a fixed width. You must select the envelope: .Erprojeculador: before. The following ³:
