

I'm not robot!

The image displays a 4x4 grid of 16 screenshots from the Malwarebytes mobile application. The screens are as follows:

- Row 1:**
 - Sign In screen with fields for Username and Password, and a 'Sign In' button.
 - Welcome Back screen with fields for Email and Password, and a 'Sign Up' button.
 - Welcome! screen with a 'Log In' button and a 'Forgot My Password?' link.
 - Sign Up screen with fields for Username, Password, and Confirm Password, and a 'Sign Up' button.
- Row 2:**
 - Welcome to Malwarebytes screen with fields for Username and Password, and a 'Sign Up' button.
 - Payment screen with fields for Amount and Remark, and a 'Pay' button.
 - Payment screen showing a transaction of \$20.00 with a 'Pay' button.
 - Add new card screen with fields for Card Number, Expiry Date, and Cardholder Name, and an 'Add Card' button.
- Row 3:**
 - Payment Summary screen showing a transaction of \$1548.00 with a 'Pay' button.
 - Payments screen showing a list of transactions for Anderson Thomas.
 - Credit Card screen showing a transaction of \$20.00 with a 'Pay' button.
 - Dashboard screen showing a list of transactions and a 'Recent Activity' section.
- Row 4:**
 - Where will you go? screen with a 'Where will you go?' button.
 - Hi, Miller Wilson screen showing a list of transactions and a 'Where will you go?' button.
 - Player screen showing a list of transactions and a 'Where will you go?' button.
 - Where will you go? screen with a 'Where will you go?' button.

ListViewAnimations is deprecated in favor of new RecyclerView solutions. No new development will be taking place, but the existing versions will still function normally. Thanks for your support! ListViewAnimations is an Open Source Android library that allows developers to easily create ListViews with animations. Feel free to use it all you want in your Android apps provided that you cite this project and include the license in your app. Features ListViewAnimations provides the following features: Appearance animations for items in ListView, GridViews, other AbsListViews; Built in animations include Alpha, SwingRightIn, SwingLeftIn, SwingBottomIn, SwingRightIn and ScaleIn. Other animations can easily be added. StickyListHeaders is supported, other implementations can easily be added. Swipe-to-Dismiss, SwipeTo-Dismiss with contextual undo; Drag-and-Drop reordering; Animate addition of items; Smoothly expand your items to reveal more content; Setup The library consists of separate modules: lib-core: The core of the library, and contains appearance animations. lib-manipulation: Contains the item manipulation options, such as Swipe-to-Dismiss, and Drag-and-Drop. lib-core-slh: An extension of lib-core to support StickyListHeaders. When using lib-manipulation or lib-core-slh, lib-core is included as well.

Add the following to your build.gradle: repositories { mavenCentral() } dependencies { compile 'com.nhaarman.listviewanimations.lib-core:3.1.0@aar' compile 'com.nhaarman.listviewanimations.lib-manipulation:3.1.0@aar' compile 'com.nhaarman.listviewanimations.lib-core-slh:3.1.0@aar' } Or: Or: Add the following to your pom.xml: com.nhaarman.listviewanimations.lib-core 3.1.0 com.nhaarman.listviewanimations.lib-manipulation 3.1.0 com.nhaarman.listviewanimations.lib-core-slh 3.1.0 Getting Started Contribute Please do! I'm happy to review and accept pull requests, Please read Contributing before you do. Animated Expanding ListView provides a fancy animation on expanding or collapsing the content of a listview item. It works in all version of Android and it's very easy to adapt to your project. How to use with Gradle Simply add the repository to your build.gradle file: repositories { jcenter() maven { url ' } } And you can use the artifacts like this: dependencies { compile 'com.leocardz:aelv:1.1@aar' // ... } Important Your list adapter must extend ArrayAdapter Your listview item must extend from AelVListItem Right after you create your listview item, you need to call yourItem.setUp(int collapsedHeight, int expandedHeight, boolean isOpen); to setup the dimensions. Your listview item view holder must extend from AelVViewHolder Right after you instantiate your view holder you need to call yourHolder.setWrap(viewWrap); and tell adapter that you are updating the item size calling holder.getViewWrap().setLayoutParams(new AbsListView.LayoutParams(AbsListView.LayoutParams.MATCH_PARENT, listItem.getCurrentHeight()));. Right before you return the view on your custom adapter, you must call yourItem.setHolder(yourHolder); You need to instantiate Aelv aelv = new Aelv(isAccordion, animationDuration, yourListItems, yourListView, yourAdapter); right after you setup your listview. Last thing; your must implement listView.setOnItemClickListner(); and insert this aelv.toggle(view, position); inside the listener and voila! Just check the app example to see it clearly.
