Announcement: This app has a successor named Skiplock. It's similar to unlock the WiFi, but with some important new features. If you purchased an unlocked with WiFi in the last two months, please contact me and rimborserÀ? your purchase or I'll give you a free copy of Skiplock. * You do not have to go Skiplock. If you're happy to Unlock with WiFi, enough of it. It will be supported yet. For a full explanation of why © SkipLock was created, see this blog post: app is not the key to unlocking skiplock. Do not buy this app if you want to use SKIPLOCK.Tibred enter your password every time you turn on your phone? Unlock with WiFi "À € Unlock your phone when you're connected to your home WiFi network. When you're at home, or work, you do not have to worry about losing your phone, so why should © enter your password? Unlock with WiFi is the app main convenience of the password on the market. it is focusing on the reliability, quality and an excellent user experience. the setup Wizard procedure simplifies configuration and useful dialog boxes are displayed if something is not right . How it works: when you get home and connect to your WiFi network, your device will unlock. Then, when you leave, and the WiFi disconnects, the device will hang again. you have to enter your password the first time you connect to the WiFi network. This is so that if someone steals or finds your phone, they can not just bring it to your house to unlock it. After entering the password once connected to your WiFi network, you will not access it again until you leave / disconnect. This is great for SMS text messages! Additional features: You can also set a lock delay, for when you are not at home. The default delay is set to 5 seconds (you can adjust it) When turning off the screen, the device does not stop until 5 seconds have passed. In this way, if you remember something you forgot to do, you can turn it back on without entering your password. This functionality is considered experimental at this time. It works on most devices, but it is not guaranteed to work on all devices. There are also battery battery Options for: Turn off WiFi When leaving the house Activate Bluetooth When you exit the house Turn off the Bluetooth function when you arrive home Deactivate Auto Sync when leaving home to turn on automatic synchronization when you arrive home widgetLocker integration in case of problems with this application, Please send me an email. Don't give me a negative review until I had the chance to help make it work! Send an e-mail with unlocking with unlockwithw [email, protected] if it does not unlock with wifi on the subject, it will be filtered as spam.Importantly: to uninstall this application, you need to select uninstall from the menu within the app. The normal way does not work if the Admin device mode is enabled.warning: this application does not work on some phones. Please read this description carefully, and the FAQs. Limitations: The application is not compatible with Motorola Skip or Points. Do not install this application on the SD card. It will not be sure if you do it. Does not work on phones that have complete encryption of the device enabled. It won't work if your employer applies a password policy on the phone. Some EXCHANGE EXCHANGE E-mail users have this. PIN only and password can be used in Android 4.0 and later. Models and Face Unlock are not supported. Unblock with WiFi is compatible with some antivirus and battery App battery. See the FAQs for details. Be sure to exclude unlocks with wifi from your task killer applications, or will not work properly.See the FAQ for more details support is only available in italiano.by download this software, you accept the License agreement with the end user, which can be read here: .
