None of this is financial advice:Part 1 Game Mechanics VideoGame Tricks Code: When a foreign company merges with NASDAQ, foreign shorts have to cover their T+35 FTDs after the string of options expires. Main point: The SEC does not care about foreign short coverage funds as Americans do. Foreign coverage funds are a fair game.Example: New Egg (NEGG) and Lianluo (LLIT). NEGG quoted on NASDAQ and LLIT was a Chinese OTC Ticker. On October 25, 2020, when the news of the merger of Lianluo Retahd LTD with NEWEGG was heard, the shares went from \$0.4 to \$4 the next day, which means the news made the shorts start to cover. T+35 days later, from June 29 to July 7, the Chinese shorts closed their position and the price waved between \$10 and \$79 intradaily.Example of the current day: Metamaterials and energy fusion of Torchlight. So, Metamaterials was a Canadian company listed in OTC that inherited the short-circuit HEAWY from a Canadian mining company while Torchlight Energy was a NASDAQ listed company. The inherited range of options for TRCH (currently called MMAT1) ends on January 21, 2022, so wait a peak T+35 days later at the beginning of March of MMAT, plus MMAT continues to quote in Canada as ticker M and when that ticker closes and converts to U.S. MMAT, foreign SHF must close FTDs MMAX.Proposed investment strategy: Buying promising companies that submit Top Penny Stock List and Weekly Update: Key AspectsThe difference between success and failure in trading can be tiny. This is not a proud lesson, but I have to share it. Don't do this... TE TAP TOPTORIO TOPTORIO TOPTORIO OF THE WEEK: Waking up on the timethat sounds obvious, doesn't it? Last Monday I was on the West Coast. I ruined a long time... night of the night, I set my alarm wrong. I wanted to set it up by 5:30 a.m. Pacific. That would have given me an hour to wake up and prepare. I'm not a morning person, waking up early, it's not my favorite thing to do. But I need time, so I'm fine with 5:30 a.m.Unfortunately, I didn't realize my alarm was wrong until it was too late. I set it right when the market opened. Looking for a trader, that's unacceptable. But it's even worse when you have an open position. I had a weekend position in Igen. It was a first game of green day OTC. Unfortunately, he had a big morning panic. So I got my commercial software up and running. It was a losing trade. Fortunately, he sold something strong on Friday, but he was undisciplined. What should have been a small win turned into a loss of \$891. It's nothing big, I said and I also managed to get out before it strikes the same day. But it's a good lesson. Often it is difference between success and failure, is often a matter of minutes or seconds. You must execute. You can't wake up late for markets or take a long positionYou're taking a short position. I see this kind of mistake. Now I've done one. Got it. According to time and get to the market ready. That doesn't mean you have to trade every day or you can't take a day off. Just remain disciplined. © Millionaire Media, LLCThis is where your journey begins.
